

S64-31381

This reference discloses a heat exchanger comprising a corrugated plate for heat conduction, which is disposed between coaxial dual tubes.

S64-31383

This reference discloses a metallic hydride retention tube 2 comprising multiple inner fins 6 that are provided between an outer tube 3 and a porous filter 4 disposed in the outer tube 3 so that they are concentric. The fins 6 have pores to fill hydrogen absorbing alloys in the outer tube 3.
